According to the reduced wartime T/O No. 04/551 of a rifle division (issued in the Summer of 1943), the T/O strength of a 120-mm mortar Battery calls for a personnel of 57. The present strength of the mentioned 5th and 6th Btry would therefore amount to 81 percent of the 1944 and 1945 wartime T/O strength of a mortar battery of a rifle division. The (2d or 3rd) battery however, much weaker,
